

MACHINE SAFETY SERVICES

EAD's preventive safety services help protect personnel and equipment, cut costly downtime and losses, and minimize liability exposure.

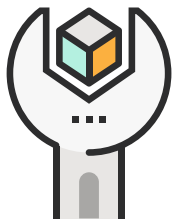

RISK ASSESSMENT AND EVALUATION

Risk assessments are a critical first step towards comprehensive machine guarding solutions. EAD provides trained safety experts that adhere to ANSI, ISO, and OSHA standards. We take the guesswork out of operator safety and machine productivity to keep your processes running 24/7/365.

DESIGN AND VERIFICATION

EAD provides recommendations and customized safety solutions that mitigate risk while maintaining machine and operator efficiency. Also, you will receive documentation of adherence to relevant safety standards to ensure workplace compliance.

INSTALLATION AND VALIDATION

Machine guarding professionals will handle the complete installation of the recommended engineering and design solution, including the validation process and functional testing of the machine safety system.

TRAIN AND MAINTAIN

A well-designed system can improve efficiency. An educated staff can mitigate risk and uphold the standards put in place. EAD provides the documentation and training necessary to protect your people and keep your equipment running efficiently.
