

Your Trusted Partner for Embedded Services

Supporting your operations with expert resources, for short-term projects to long-term solutions.

EAD's embedded services seamlessly integrate experienced professionals into your team at your facility to support your operations, projects, and technical needs. Whether managing your complex projects or providing specialized engineering or controls automation expertise, our embedded resources serve as your trusted partner to ensure project success. With our professionals embedded in your facility, you gain immediate access to industry-leading expertise tailored to finding solutions to your unique challenges.

Benefits:

- Flexible solutions for both short-term monthly or long-term year-over-year needs
- Expertise across the food and beverage, life sciences, consumer goods, parcel & logistics, and other industries
- A focus on achieving your objectives on time, within budget, and to the highest standards

WHY CHOOSE EAD FOR EMBEDDED SERVICES?

We provide technical expertise that drives success when you need it most.

- **Certified Professionals:** PMP-certified project managers with expertise in LEAN, Six Sigma, and other methodologies
- **Skilled Engineers:** Licensed Professional Engineers (P.E.s) and trades experts with advanced certifications, including journeymen and welding specialists
- **Industry Insight:** Decades of experience in manufacturing and regulated, critical industries
- **Industry Compliance:** Professional team trained, knowledgeable, and compliant with regulatory and industry standards (OSHA, FDA, GMP, etc.)
- **World Class Safety:** 2,000,000 work hours without a recordable incident and ZERO Total Frequency Injury Rate (TFIR) for the last 12 years
- **Lower Overhead:** No benefit costs, taxes, or long-term commitments—just the expertise you need
- **Budget-Friendly:** Allocate embedded personnel to your capital budget, and reduce strain on operating costs
- **Expertise on Demand:** Specialized skills for specific projects without permanent hires
- **Scalable Workforce:** Expand or downsize as projects require
- **Effortless Integration:** Embedded personnel integrate seamlessly with your team and culture, driving results from day one

- Resource management and project personnel, vendor, and contractor coordination
- Planning, scheduling, budget management, and reporting
- Vendor bid document development
- Contractor safety oversight and site risk management
- Asset reliability and root cause analyses

YOUR TRUSTED EMBEDDED SERVICES PROVIDER

At EAD, we serve as your experienced guide, helping you avoid costly mistakes and ensure your project goals are met with efficiency and accuracy. From concept to completion, we work as an extension of your team, advocating for your best interests every step of the way.

Your embedded resources become an extension of your team, leveraging their expertise to:

- Build relationships with stakeholders to streamline feedback and keep projects on track
- Collaborate with vendors and partners to ensure on-time and on-budget execution
- Immediately respond to facility challenges with on-the-spot troubleshooting and problem-solving
- Accelerate project completion by leveraging site familiarity and process expertise
- Seamlessly integrate into your team and company culture
- Mentor and train internal staff to build long-term capability

MANAGEMENT AND ENGINEERING EXPERTISE FOR SIMPLE TO COMPLEX PROJECTS

Our embedded project managers specialize in handling everything from contractor bids to schedule management, budget tracking, and risk mitigation. Our engineering and other technical experts supplement your team, offering specialized knowledge and immediate responsiveness. Embedded technical resources provide custom engineering solutions, troubleshoot issues, and ensure compliance with safety standards. Their contributions strengthen your operations team and improve equipment reliability. Services include:

- Custom engineering design
- Troubleshooting and preventative maintenance
- SOP development and staff training
