
UL 508A & UL 698A/B CERTIFIED FACILITY **INDUSTRIAL CONTROL PANEL FABRICATION**

EAD is a UL 508A and UL 698A/B certified facility providing custom industrial control panel fabrication backed by engineering, controls integration, testing, and quality review.

From concept development and panel design through fabrication, testing, delivery, and startup support, EAD provides one accountable partner to help industrial organizations reduce execution risk, improve quality, protect schedules, and support reliable operations.

Whether you need a single custom panel, repeat OEM production, or a broader automation solution, our experienced team delivers panels aligned with your operating requirements, schedule, and budget.

ONE ACCOUNTABLE PARTNER

EAD coordinates engineering, controls, drafting, fabrication, testing, delivery, and startup support through one integrated team, reducing handoff gaps and creating a clear path from an early concept or existing design to a complete, field-ready panel solution.

WHY CLIENTS CHOOSE EAD

UL 508A & UL 698A/B Certified Facility. Panels are designed, fabricated, and reviewed to address applicable UL standards, NEC requirements, and project-specific electrical and industrial specifications.

One Integrated Team. Engineering, controls, drafting, fabrication, testing, and automation specialists work together to reduce handoff gaps and late-stage surprises.

Flexible Production Capacity. From one-off custom solutions to repeat or high-volume OEM programs, EAD can scale support to meet project and production requirements.

Responsive Delivery. Expedited or emergency fabrication, ready-to-ship solutions, and just-in-time delivery options help keep critical work moving.

SILVER
System Integrator
A ROCKWELL AUTOMATION PARTNER

ROCKWELL AUTOMATION RECOGNIZED SILVER SYSTEMS INTEGRATOR

Panel fabrication backed by practical automation and controls integration expertise.

COMPLETE PANEL SHOP CAPABILITIES

EAD supports projects at virtually any stage of development. Our Panel Shop can provide standalone fabrication or support broader engineering, automation, project delivery, and integrated delivery programs.

PANEL FABRICATION

PLC, VFD, HMI, remote I/O, power distribution, junction box, marshalling, operator station, and other custom industrial control panels.

CONTROL PANEL DESIGN

Concept development, complete panel design and layout, bill of materials development, electrical drafting, drawing reviews, design modifications, and For-Record/As-Built red-line drawings.

FLEXIBLE DELIVERY

Single custom builds, repeat or high-volume OEM programs, ready-to-ship solutions, expedited or emergency turnaround, and just-in-time delivery.

PROGRAM AND VISUALIZATION DEVELOPMENT

Turnkey PLC and HMI software development services, provided as part of a complete control panel solution or as a standalone offering.

SUPPORT AT ANY STAGE

Whether you have an idea-stage concept, marked-up drawings, existing documentation that needs modification, a complete issued-for-fabrication design, or an OEM production requirement, EAD can help define the path forward and deliver a solution aligned with your operating requirements, schedule, and budget.

Project Starting Points

- Idea-stage concepts
- Marked-up drawings
- Existing designs or documentation
- Issued-for-fabrication designs
- Repeat or OEM production requirements

BUILT FOR CLIENTS AND PARTNERS

- Manufacturers and industrial facility owners
- OEMs
- Engineering firms
- System integrators
- Contractors

WHAT THIS MEANS FOR YOUR PROJECT

- Reduced execution and handoff risk
- Better alignment between panel design, fabrication, and controls integration
- More flexible support for schedule, capacity, and production requirements
- Qualified fabrication backed by engineering and automation expertise
- One team accountable for clear communication and coordinated delivery

PARTNER WITH EAD

We understand how critical effective project execution, resource allocation, and regulatory compliance are to your business. That's why we offer tailored solutions, customized to your specific needs and objectives, to ensure your projects are completed on time, within budget, and in alignment with the highest quality standards.

Our licensed Professional Engineers, PMP-certified management professionals, and seasoned field teams bring our years of industry experience and technical expertise to every project. With EAD as your partner, you can expect a collaborative approach, open communication, and a commitment to excellence.
